

Change History Log:

117.4.1b, Revision 1: EAI Monthly Performance Report II

FSA Requested Changes/Comments	Page	Author	Date	Change Made Y/N	Comment
1. Sections 4.1.6.1, 4.1.6.2, and 7.2.1 tables and Appendix E – EAI Software Installation Report - There are two (2) servers listed in the table in section 4.1.6.2 that are not listed among the servers listed in Appendix E. These servers are HPN7 and rp-7410-1. Section 7.2.1 table lists HPK2 for the PEPS Production server where as Appendix E lists rp5470-1 for this server. Furthermore, Appendix E lists servers that are not listed in any of the tables or text in the main document - e.g., r2470-2, r5470-6, r5470-11, HPN25, HPL12, HPL13, and others.	12, 22, App. E	Brian Whisnant	2/27/04	Y	<p>For section 4.1.6.2: rp7410-1 is not a part of the environment and had been mistakenly added to the table. It has been removed. HPN7 had been mistakenly omitted from Appendix E, and has been added.</p> <p>The listing in the section 7.2.1 table was the old PEPS Production server, and the entry in the Appendix was the new PEPS Production server. This has been addressed, see comment below.</p> <p>The tables in section 4.1.6 only list servers related to FAFSA, and the table in section 7.2.1 only lists servers affected by the hardware refresh. The hardware refresh table has generally only listed the name of the server to be refreshed, and not the name of the new server (i.e. r2470-2). Any server not involved in the refresh (i.e. hpl12) was not mentioned at all. To avoid confusion, two items have been added to this section: names of new refreshed servers (in the table) and a note regarding servers not involved in the hardware refresh effort.</p>
2. Another minor point – When Appendix E is printed, the “as of” date and time printed at the top of the page is the date and time the report is actually printed rather	App. E	Scott Van Velsor	2/27/04	Y	The appendix header has been changed to reflect the original deliverable due date to avoid such confusion.

than the date (and time) when the listed information was gathered. This may give the impression that the data is more current than it really is.
